Re: NNE Construction, Inc.

To Whom It May Concern:

We have worked with NNE Construction, Inc. for many years and in many capacities such as a 300 mile fiber plow job, directional drilling, highway widening and utility relocation projects to name a few. NNE has always been professional and capable in all aspects of the work they do.

We find NNE to be dedicated to providing quality construction, technical and management services. They have always been safety conscious and produced quality work. All work has been completed within the time frames established.

Curtis and Sons have always enjoyed working with NNE and look forward to a long working relationship.

Sincerely,

David Curtis, Owner
Curtis and Sons Construction, Inc.
